**HI-DEF TV INFO:** Our Hi-Def signal in the park is MPEG4 and not all Hi-Def TVs are compatible with MPEG4 but rather MPEG2. Most Smart TVs and newer major brands are MPEG4. Instructions: 1) Turn OFF your Antenna Booster (make sure green or red light is OFF) 2) Go to TV Menu, Channels, switch to CABLE (not "AIR") and SCAN Digital Channels. Once you see 48 Channels found, you can exit out during the scanning. 3) Other common issues a) Coaxial cable is bad, we have loaners; b) connections need to be hand-tight and not loose. 4) Call us if you need assistance. If you hear audio and have no picture, your Hi-Def TV is MPEG2. We have converter boxes to convert MPEG4 to MPEG2, or we can loan you a TV for the night.
